Information Security

refers to the protection of information from unauthorized access, changes or destruction, in order to ensure **confidentiality, integrity** and **availability**.

This includes measures such as access control, encryption, authentication and risk management.

INFORMATION SECURITY

Minimization of security risks

Security of data protection

Improving resilience against attacks

We help organizations proactively address security threats by implementing security policies, creating incident response plans, and training employees.

Information Security Management System (ISMS)

The ISMS enables your company to optimize the interaction between data protection, IT security and your processes.

OUR EXTERNAL CISO

By hiring and integrating **our external CISO**, **information security** in your company is optimized in a targeted manner. Together, we use **objective expertise** and innovative perspectives to create a pioneering **security structure** for the future.

SUCCESSFUL WITH OUR EXTERNAL CISO

Our IT consultants advise you on the **selection, implementation** and **continuous improvement** of technical and organizational measures to create and maintain a **specific level of security.**

YOUR BENEFITS OF HAVING AN EXTERNAL CISO

Objective assessment

Our independence from internal company processes allows us to objectively assess IT security.

Focus on core competences

By using external specialists in the field of information security, you can focus on your core competences.

Specialized expertise

Thanks to our specialized knowledge in the IT sector, we provide the company with access to expertise and modern technologies.

Flexibility and scalability

Our network of specialists enables us to respond to all of the company's business needs.

THANK YOU!

Do you have any questions?
I look forward to hearing from you.
